

NT Advisory Group (NTAG)
Action Item

8 July, 1999

99070804

Submitter Name: NTAG general session

Submitter Organization: GCCS-AF

Action Item Title: NT Service Pack Segmentation

Narrative: NT service pack 4 is being segmented by DISA. Thought service packs were part of the NT OS and did not have to be segmented to be COE compliant?

To load kernel 4.1 you must already have service pack 4 loaded, so why segment the service pack?

Assigned to: Eric Krum

Initial Due Date: Sept 99

Follow Up Action:
